

Swag Labs – QA Test Plan & Bug Report

Tester: Kavya Gouravaram

Website: <https://www.saucedemo.com>

Testing Type: Manual Testing

Environment: Windows 11, Google Chrome / Microsoft Edge

1. Test Plan

1.1 Scope

The testing covers:

- User authentication/login
- Product browsing
- Product details
- Product images, names, descriptions and prices
- Product sorting
- Add to Cart and Remove from Cart
- Cart functionality
- Checkout workflow
- Checkout field validation
- Negative and edge-case scenarios

1.2 Types of Testing

- **Functional Testing** - Verify that application features work as expected.
- **UI Testing** - Verify product images, names, prices, buttons and page layout.
- **Negative Testing** - Test invalid and missing information.
- **Edge Case Testing** - Test unusual/invalid inputs and boundary conditions.
- **Cross-Browser Testing** - Test using Google Chrome and Microsoft Edge.

1.3 Test Environment

Item	Details
Website	Swag Labs - saucedemo.com
OS	Windows 11
Browser 1	Google Chrome
Browser 2	Microsoft Edge
Testing	Manual exploratory and functional testing

1.4 Test Data

Username	Purpose
standard_user	Normal functionality
locked_out_user	Locked-out login validation
problem_user	Functional/UI defect testing
performance_glitch_user	Performance testing

Password: secret_sauce

1.5 Test Cases

TC01 - Login with Valid User

Steps: Enter standard_user and secret_sauce, then click Login.

Expected: User should successfully reach the Products page.

TC02 - Login with Locked-Out User

Steps: Enter locked_out_user and secret_sauce, then click Login.

Expected: Login should be blocked and an appropriate error message should appear.

TC03 - Add Product to Cart

Steps: Login, select a product and click **Add to cart**. Open the Cart.

Expected: Selected product should appear in the cart with the correct product information.

TC04 - Checkout With Missing Information

Steps: Add a product, open Checkout, leave required fields empty and click Continue.

Expected: Appropriate validation message should be displayed and the user should not proceed.

TC05 - Checkout With Invalid Postal Code

Steps: Enter valid first name and last name but enter @@@ as Postal Code and click Continue.

Expected: Invalid postal code should be rejected with appropriate valid

1.6 Risk Assessment

Area	Risk
Login	Users may be incorrectly authenticated or blocked
Product information	Incorrect images/details can mislead customers
Product sorting	Products may not be sorted correctly
Cart	Incorrect products or information may appear
Checkout	Users may be unable to complete an order
Validation	Invalid data may be accepted
Error handling	Errors may result in blank/white pages

2. Bug Reports

BUG-001 Incorrect Product Images on Products Page

Severity: Medium

Priority: High

Steps to Reproduce:

1. Login using problem_user.
2. Navigate to the Products page.
3. Observe the product images.

Expected Result:

Each product should display its corresponding product image.

Actual Result:

Multiple products display an incorrect image instead of their corresponding product images.

Impact:

Users may be unable to visually identify products correctly.

BUG-002 Product Details Do Not Match Selected Product

Severity: High

Priority: High

Steps to Reproduce:

1. Login using problem_user.
2. Open the Products page.
3. Click a product such as **Sauce Labs Bolt T-Shirt**.
4. Observe the product details page.

Expected Result:

The selected product's name, image, description and price should be displayed.

Actual Result:

The product details page can display information for a different product.

Impact:

Users may purchase the wrong product because the selected product and displayed product information do not match.

BUG-003 Product Sorting Does Not Work

Severity: Medium

Priority: Medium

Steps to Reproduce:

1. Login and open the Products page.
2. Open the sorting dropdown.
3. Select Price (low to high).
4. Observe the product order.

Expected Result:

Products should be arranged from the lowest price to the highest price.

Actual Result:

The product order does not change as expected after selecting the sorting option.

Impact:

Users cannot reliably find products based on price.

BUG-004 Incorrect Product Information in Cart

Severity: High

Priority: High

Steps to Reproduce:

1. Login using problem_user.
2. Add products to the cart.
3. Open the Cart.
4. Compare the cart items with the products selected.

Expected Result:

The cart should display the exact products selected by the user, including correct name, image and price.

Actual Result:

Incorrect product information can appear in the cart, including mismatched product details.

Impact:

Users may be shown or purchase an item different from the one they selected.

BUG-005 – Checkout Opens a Blank/White Page

Severity: Critical

Priority: High

Steps to Reproduce:

1. Login using problem_user.
2. Add a product to the cart.
3. Open the Cart.
4. Click Checkout.

Expected Result:

The **Checkout: Your Information** page should open and display the checkout form.

Actual Result:

A blank/white page is displayed instead of the checkout page.

Impact:

The user cannot proceed with the purchase, resulting in a complete checkout failure.

Conclusion:

Manual exploratory testing identified functional, UI, product-data and checkout issues in the Swag Labs application. The highest-risk issue identified was the blank checkout page because it prevents users from completing purchases.
